

Acoustic Floor Coverings

Armafloor - A range of products that reduce impact noise at source

INTRODUCTION

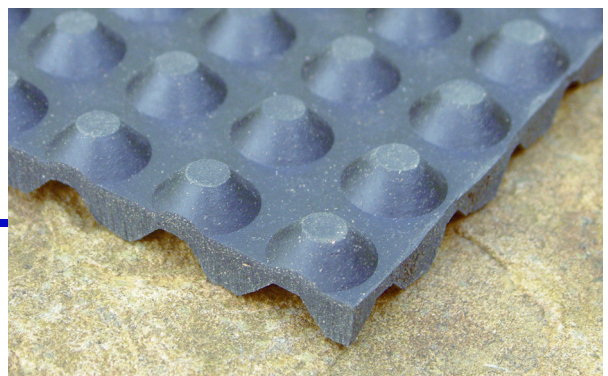

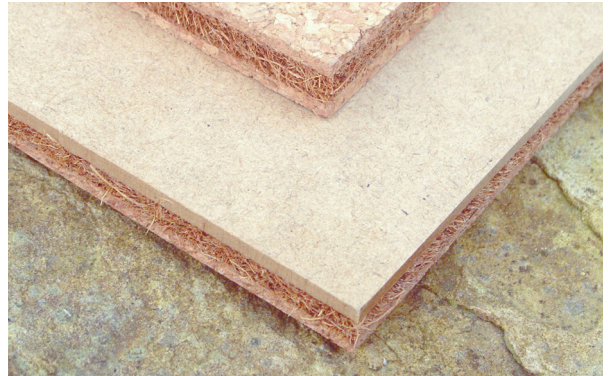

In multi level living and working environments there is a growing need to install specialist coverings for sound control and thermal insulation.

Armafloor offers a range of products from budget roll out 2mm cork/recycled rubber amalgams to 700mm by 1200mm, 12mm thick composite sheets of agglomerated cork, coconut fibre and medium density fibreboard. All manufactured to the highest standards with durability to last the lifetime of the building.

A simple assessment of requirements can quickly identify the right product for your needs and installation guides make the whole process of laying the materials simple and easy.

Whether it is for new build or a refurbishment project, call Armadillo and ask one of our consultants to advise on the right solution for your application.

Full specifications, including acoustic, thermal, physical and mechanical properties are available for the whole of the range.

Applications

- All Armafloor materials require sound, smooth, dry and contaminant free subfloors.

Ideal for all floor finishes:

- Vinyl
- Wood
- Ceramic Tiles
